

## LICENSE — OpenGiraffe Documentation License (CC BY-SA 4.0)

This file describes the *documentation* license for the OpenGiraffe orchestration architecture. It is separate from the software license (OGPL-1.0) and applies *only* to the conceptual, descriptive, and explanatory material.

This document was first published by Oscar Schreyer (Optimando.ai) in 2025, and authorship is cryptographically timestamped.

### 1. Scope of This License

This license applies **ONLY** to the following materials:

- architectural descriptions
- diagrams and conceptual illustrations
- explanations of the orchestration model
- workflow logic descriptions
- academic or explanatory articles
- textual, illustrative, and design-oriented documentation

These materials are licensed under:

Creative Commons Attribution-ShareAlike 4.0 International (CC BY-SA 4.0)

 <https://creativecommons.org/licenses/by-sa/4.0/>

The ShareAlike requirement ensures the *orchestration model itself* remains open, traceable, and publicly verifiable as prior art.

**Important:** The software implementation, including the orchestrator, Augmented Overlay, WRCode integration, WRVault, WRGuard, and all executables, is *source available* and is licensed under OGPL-1.0.

### 2. Permissions (Documentation Only)

Under CC BY-SA 4.0, you may:

- **Share** — copy and redistribute this documentation in any format
- **Adapt** — remix, transform, extend, or build upon the documentation
- **Use Commercially** — including incorporation in academic or commercial publications

These rights apply only to documentation, *not* the software.

### 3. Conditions (Documentation Only)

#### 3.1 Attribution

You must attribute the original author clearly:

“OpenGiraffe Orchestration Model — optimando.ai”  
with a link to: <https://optimando.ai>

Attribution must be visible in your published work.

**Prohibited:**

- hiding attribution in modals, footnotes, metadata, or code comments
- burying attribution behind user actions

**Allowed:**

- visible header/footer marks
- alongside diagrams or conceptual references
- in academic citations

### 3.2 Indication of Changes

If you publish modified or extended documentation:

- you must clearly state that changes were made
- you must link back to the original source

This applies only to documentation, *not* software.

### 3.3 ShareAlike Requirement

If you publish derivative documentation:

- you must license it under CC BY-SA 4.0
- you must keep attribution visible

This ensures that the conceptual model of OpenGiraffe stays open.

### 3.4 No Additional Restrictions

You may not impose DRM or technical restrictions that prevent others from exercising CC BY-SA 4.0 rights on documentation.

## 4. Software License (Clarification)

The *software implementation* — including:

- OpenGiraffe Orchestrator
- Augmented Overlay runtime
- WRCode Workflow-Ready Code integration
- WRVault
- WRGuard / WR MailGuard
- any scripts, binaries, modules, or runtimes

—is licensed separately under:

**OGPL-1.0 — OpenGiraffe Protected License**

A source-available, non-redistributable, non-forkable, no-SaaS license.

Documentation ≠ Software. Documentation is open (CC BY-SA 4.0).  
Software is protected (OGPL-1.0).

## 5. Branding Preservation (Software Only)

For the software (OGPL-1.0), you may not remove or hide branding related to:

- OpenGiraffe
- WRCode
- WRVault
- WRGuard

White-labeling requires a commercial agreement.

(This rule does not apply to documentation.)

## 6. Commercial Licensing

For:

- closed-source deployments
- SaaS/cloud usage
- enterprise integration
- white-label builds

---

## 7. Summary

Documentation → Open & Share-Alike (CC BY-SA 4.0)

Software → Source-Available & Protected (OGPL-1.0)

You may reuse and extend the *architecture documentation* under CC BY-SA,  
but you may not reuse or distribute the runtime software.
